New international elite study program *Biological Physics*

Dear International Office of the Aristotle University,

recently, a new study program *Biological Physics* was established at the University of Bayreuth. The program is aimed at international students of biology and physics who are interested in technologically and socially relevant interdisciplinary research. In an open atmosphere, in which learning is a pleasurable experience, the program offers a diverse set of courses, ranging from lectures and lab courses over social soft skills to the opportunity to do research abroad. The course language is English.

We would be grateful if you could point out this opportunity to your students by placing the enclosed posters and flyers at appropriate places in your institution.

Sincerely,

Stephan Kümmel
