

Dr Andreas Germanos Karydas is Director of Research at the Institute of Nuclear and Particle Physics of the National Center for Scientific Research "Demokritos" and Scientific Responsible of the X-ray Fluorescence Laboratory. He holds a BSc in Physics from Athens University and a Ph.D. in the field of Analytical Applications of Nuclear Techniques from the National Technical University of Athens (1994). He has had a research experience of more than twenty-five (25) years, including six (6) years (2009-2015) as a leader of the XRF group of the Nuclear Science and Instrumentation Laboratory (NSIL) at the International Atomic Energy Agency (IAEA). His research interests include the study of fundamental X-ray interactions with matter and de-excitation processes of ionized atoms, in particular of the X-ray Resonant Raman scattering and cascade X-ray emission and the development of analytical methodologies, instrumentation and interdisciplinary applications of X-ray fluorescence and Ion Beam Analysis techniques, with emphasis on the areas of cultural heritage, materials science, environmental monitoring and biomedicine/pharmaceuticals. Dr A. G. Karydas has coordinated many National, bilateral and European competitive projects on behalf of I.N.P.P. and has acted as a National delegate in IAEA Regional Technical Cooperation projects and COST actions. He has published 137 articles in international peer-review journals and 27 in peer-review conference proceedings having received over 2,000 citations.
