Περίληψη:

This seminar will discuss the recent developments and mission updates of ClearSpace, an in-orbit servicing (IOS) company created in 2018, that is intent on revolutionizing how space missions are conducted. ClearSpace is creating the technologies that will support a wide range of IOS applications, from disposal and in-orbit transport to inspection, assembly, manufacturing, repair, and recycling. ClearSpace aims to support institutions and commercial operators alike to enhance sustainable space operations and promote a circular space economy.
